The document D1 discloses (the references in parentheses applying to this document):

Cable connector (1,3,5) comprising a housing having a die-cast base (1) substantially extending between a front side and a rear side of said connector (1,3,5) whereby a die-cast first housing part (3) mounted to said die cast base (1) such that said die-cast first housing part (3) and a first portion of said die-cast base (1) determine a first cable connector portion at said rear side a metal sheet formed second housing part (5,30) mounted to said die-cast base (1) such that said metal sheet formed second housing part (5,30) and a second portion of said die-cast base (1) determine a second cable connector portion at said front side.

- 2) The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 18 is not new in the sense of Article 33(2) PCT.

The document D1 discloses (the references in parentheses applying to this document):

Method of assembling a cable (6,7) to a cable connector (1,3,5) according to claim 1, comprising the steps of:  
providing a cable (6,7) having a cable ferrule in said first portion of said die-cast base (1)

mounting said metal sheet formed second housing part (5,30) to said second portion of said die-cast base (1)

mounting said die-cast first housing part (3) to said first portion of said die-cast base (1) while clamping protrusions (33,34) of said metal sheet formed second housing part (5,30) between said cable ferrule and said die-cast first housing part (3)
